

Google Chrome

When I print a webpage it come out too small or too big. How do I make it normal size?

In chrome when you are printing there is an option to change the scale of the printing. This setting can often get modified to change the size of the printing and make either too large or too small.

To locate this scroll down on the left hand side to more settings and click to expand.

The image shows the Google Chrome print dialog box. At the top, it says "Print" and "Total: 1 sheet of paper". There are two buttons: "Print" (blue) and "Cancel" (white with blue border). Below this, there are four settings: "Destination" set to "NPI26151E (HP Las)", "Pages" set to "All", "Copies" set to "1", and "Layout" set to "Portrait". At the bottom, there is a "More settings" link with a downward arrow, and a "Print using system dialogue... (Ctrl+Shift+P)" link with an external link icon.

It will then look like this.

Google Chrome

Print

Total: 1 sheet of paper

Print Cancel

Destination  NPI26151E (HP Las ▼

Pages All ▼

Copies 1

Layout Portrait ▼

More settings ^

Paper size A4 ▼

Pages per sheet 1 ▼

Margins Default ▼

Quality 600 dpi ▼

Scale Default ▼

As you can see there is a scale option make sure this says default not customised. If

Google Chrome

it says customised change it to default and this should return the size back to default.
