Internet

I have a Plusnet 2704N Sagemcom Router how do I access the enhanced settings page.

The usual address for this router http://192.168.1.254 which will bring you to the normal settings. If you require the enhanced settings the normal address is http://192.168.1.254/expert_user.html. Just be a little careful with the settings here as they cause loss of connection.

If your router is not on the standard address check out our instructions on how to find my routers address.
