Google Chrome

How do I view and/or backup my password stored in Google Chrome ?

Open Chrome
Click the triple dots in the top right hand corner of the window and select settings

In the search bar at the top type passwords. In Auto-fill click passwords.

Here you can see your stored passwords by clicking the eye icon next to the hidden password .

You can backup your passwords by clicking on the triple dots next to the password header and choose the export option.

Unique solution ID: #1004
