

## Other

### **I have just had a phone call saying my internet is about to be cut off, what should I do?**

These phone calls are always scams. When an internet provider is going to cut you off they always just cut you and wait for you to contact them or they contact you by letter if they are closing.

If you think it is genuine phone your provider on a phone number you have for them on a different phone ( if they have phoned you on your mobile phone them back on your landline and if they phone you on your land line phone them back on your mobile) do not let them take control of your computer as no provider will do this.
